Dimensions: 1370 x 1370 x 2600 mm
Weight:300 kg
Color: Orange RAL2004
Internally:.....Grey RAL7023
Fixing: On the floor with dedicated anchorages

General Description

The SOS **CAB260** telephone booth is part of the **SILENCERCOM™** range of emergency telephony accessories. It is designed for installation in road tunnels.

Made of painted aluminum or stainless steel, it ensures resistance to weather conditions and long-term durability.

The structure is optimized to provide protection for users in case of emergency, allowing access to the SOS emergency telephone and, if necessary, to fire extinguishers.

Technical Features

- Double-leaf door with opening in both directions to facilitate access
- Eight transparent polycarbonate panels on the doors to ensure internal and external visibility
- Lighting: LED IP54, 230V AC power supply to ensure interior visibility in all conditions
- SOS telephone: Provision for SOS telephone and optional alarm buttons
- Fire extinguisher compartments: two positions for extinguishers on the right and left sides
- Cable passages: Rear and bottom entry with removable plate to facilitate installation
- Handling: Lifting eyebolts

Functions and Advantages

- Durable and resistant aluminum structure
- High visibility thanks to the orange color
- Easy access with two swing doors
- Internal LED lighting system to ensure operation under all conditions
- Easy installation and wiring thanks to removable internal plates
- Ideal for road tunnels and high-criticality environments

Packaging and Transport

To reduce packaging and shipping costs, the cabin can be delivered disassembled. Assembly following the provided instructions takes approximately 60 minutes.
