EASYTALK-inox® is an Acoustic booth made of INOX Stainless Steel (AISI304 or AISI316), especially designed for installation in corrosive industrial and marine areas, Off-Shore & On-Shore, with non hygroscopic sound absorbing filling material.

The Acoustic Booth **BTA5/A** is a very robust and durable booth, but designed with a great attention to the aesthetic appearance. The assembly between the parties is made with extreme attention to detail, in order to satisfy the most demanding customers. The exterior surfaces are well finished with epoxy painting, with quality that satisfies the most demanding customers.

EASYTALK-inox® BTA5/A is designed for use in extreme environments, including any kind of industrial areas and marine applications.

The attenuation capacity is included in the range 13÷23dB, depending by positioning of the booth, measured with man inside.

On the internal vertical plate you can fix any kind of industrial telephone (using the kit of threaded bushings supplied together with the booth).

The inner side walls are finished by stainless steel high density drilling plates.

On demand, is available an internal courtesy IP65 lighting systems by LEDs lamps, powered at 230Vac or 12/24Vdc.

MAIN CHARACTERISTICS

- Generous size, suitable for installing heavy industrial telephones (up to 25kg)
- Easy wall fixing system, by two holes on the back and a security holding point on the front down
- Accessories for mounting external flashing beacons and howlers are available on demand
- Suitable to be mounted on accessorized poles included in our range

INTERNAL LIGHTING

The BTA5/AL is equipped with robust IP65 recessed LED lamps fixed internally on the roof, in order to illuminate the telephone. Cables are wired internally and an On/Off weather-proof switch can be mounted on demand on the left side plate.
